Subject: Submittals of Calc sheets for verification of ORS areas

This is a reminder of the decision of the R/W Plans Manager, that when submitting calculation sheets for verification of areas shown on the ownership record sheet, a separate calculation sheet needs to be submitted for ALL areas shown, including TCE's and remainder areas. If a particular area shown on the ownership record sheet is not directly stated on the calculation sheet, and is for example, the result of adding several separate areas shown on the calculation sheets, then notes should be added to the sheets giving such directions. Thank you for your cooperation
